## Educations

HUTECH UNIVERSITY (2019-2023)

- Major: Information Technology
- GPA: 3.3/4.0

## Skills

- Languages: Java, C#
- Framework: SpringBoot, Asp.Net Core
- Database: SQL Server, MySQL, PostgreSQL
- Other Technology: Git, Docker, Redis, Minio, Log4j
- English B1

## Award

- 2nd Semester 2021 - 2022  
Student Achieves Excellent  
Results with a GPA > 3.2

## Experience

COLLABORATOR AT VNPT-IT2 COMPANY (07/2023-NOW)

VNPT MAPS (12/2023-Now)

- Project: VNPT MAPs
- Description: VNPT MAPs is a digital mapping platform within the GIS ecosystem is produced by VNPT-IT2
- Position: Java Developer
- Responsibilities:
  - Maintain and develop features for the routing module:
    - Optimize and streamline calls through the internal interface
    - Researching and programming with the Grapphopper library for the routing module
  - Maintain and develop features for the system admin module:
    - Participated in programming and developing data classes
    - Participated in programming cache-related processes using Redis
    - Participated in programming log recording functionality for the application using Log4j
  - Contribute to writing documents for VNPT MAPs:
    - Contributed to the documentation of the routing module
    - Draw the process flowchart for the routing module.
  - Participate in team meetings for project development.
- Technology: Java, Springboot, PostgreSql, Redis, Log4j

## VNPT GDCI (07/2023-12/2023)

- **Project:** VNPT GDCI
- **Decripstions:** VNPT GDCI is a Database Management System for the Construction Industry in Cà Mau Province is produced by VNPT-IT2
- **Position:** .NET Developer
- **Reponsibilities:**
  - Maintain and develop features for the main module:
    - Participated in the analysis and programming to build data structure for data classes
    - Participated in programming management functionalities for data classes
  - Maintain and develop features for the system module:
    - Participated in programming file management functionalities using Minio storage and NetVips library
  - Maintain and develop features for the report module:
    - Participated in programming the data statistics feature based on specified criteria
  - Participate in team meetings for project development
  - Participated in programming to fix bugs that emerged during the testing phase
- **Technology:** C#, Asp.NET Core, SQL Server, Minio

## INTERNSHIP AT VNPT-IT2 COMPANY (05/2023-07/2023)

- **Position:** Java intern
- **Reponsibilities:**
  - Explore the design principles of RESTful API and the Microservices architecture.
  - Research and build a project using Spring Boot and PostgreSQL
  - Learn how to manage source code with Git and version control
  - Learn about using Docker and apply it to a project
- **Technology:** Java, Springboot, PostgreSql, Docker, Git
- <https://github.com/khanhtuan2001/employee-management.git>

## BUS TICKET MANAGEMENT APPLICATION

(06/2022-09/2022)

-   
revenue and crud bus information
- **Number of members:** 3
- **Technology:** C#, winform, Sql Server
