# NGUYEN DINH PHI HUNG

FULL - STACK DEVELOPER

## Basic information

I have five years of experience in programming.

I have worked through projects in fields such as express & logistics, e-commerce, social networks for businesses, and resident management, chemical management.

In addition to professional skills, I also have soft skills such as good communication, self-education, fast problem solving, effective teamwork, and being able to work independently.

## Career Objective

Taking advantage of programming skills, experience, and understanding of technology to become a professional Technical Leader brings a lot of value to the customers. From that, I will contribute to the development of the company.

## Education Background

2016 - 2020

Bachelor in Software Engineering, Industrial University of HCMC

## Work Experiences

Jul 2022 - Feb 2025 – Work in Netpower

**Project:** *Workplace Safety*

**Position:** *Full-Stack Developer*

**Skill:** *Angular, .NET Core, SQL Server*

**Description:** This is a project about chemical management in the workplace, designed to help users track what substances are present, create tasks for employees using the chemicals, and monitor exposure. The customers are all from Europe, especially Norway

### Working:

- Daily meetings with the team to share about yesterday's work, today's tasks, and weekly meetings to report on progress to the project manager.
- Develop new features or fix bugs based on the requirements of each customer.
- Build a tool using WinForms that helps employees map substances from another system to a sample substance for import into our system.
- Support the development of a Webhook to receive updated SDS (Safety Data Sheet) data from the SDS Manager server to update the SDS in real time for the WS system.
- Build a 'Project' and 'Hub Sharing' feature to generate data packages intended for upload to the shared hub to share information with other customers across the WS system.
- Develop a feature to detect hazardous substances based on the components of the compound described in the SDS data.

## Skills

- Technical Skills: Angular, .NET Core, ASP.NET MVC, Ionic, Typescript, HTML5/CSS
- Database Skills: MS SQL Server, My SQL
- Soft Skills: Communication, collaboration, problem-solving
- Field of Interest: Individuals with a passion for problem-solving and technology

## Socials
