

NGUYEN PHI TUAN AN

Frontend - Fullstack developer

OBJECTIVE

I aspire to become a talented full-stack developer who can make a real difference in the success of the company I work for. My goal is to excel in both front-end and back-end development while keeping up with the latest industry trends and innovations.

SKILLS

Javascript	My primary programming language, and I primarily work with libraries and frameworks built on it
React.js	Proficient in using React for building interactive user interfaces, understanding of React hooks, context API, and component lifecycle
Express.js	Using this backend framework, which based on Node.js, to build APIs
HTML & CSS (TailwindCSS)	In-depth knowledge of HTML and CSS for creating responsive and accessible web designs. Tailwind CSS is currently my favorite CSS framework
MongoDB	Proficient in using MongoDB to store and retrieve data. Currently, I use it to manage data for my projects.
Tool	Visual Studio, Github, Postman, Jira

WORK EXPERIENCE

Bosch global software company	04/2022 - Present
Frontend developer	
<ul style="list-style-type: none">• Project Description: Utilized an internal platform based on JIRA to create multiple workflow applications.• Responsibilities: Primarily used vanilla JavaScript to develop both large and small applications, implement additional change requests for existing applications, resolve bugs, and consult with customers to provide the most efficient solutions for their change requests.	
Netcompany	01/2021 - 03/2022
QA/QC	
<ul style="list-style-type: none">• Project Description: Worked on a UK-based project called Sedex, which is related to audits.• Responsibilities: Tested individual modules such as Signup, Login, Logout, auditing, and creating records, among others. Additionally, performed integration testing for external APIs.	

EDUCATION

Tôn Đức Thắng University (Cross-border study)	2015 - 2018
Computer science	
GPA: A (88.7/100)	
Lunghwa University (Cross-border study)	2018 - 2020

CERTIFICATIONS

IELTS 6.0	Summer 2017
Lowcode platform Outsystems - Associate Reactive Developer	12/2024

HONORS & AWARDS

Associate of the month (At Bosch)	10/2024
-----------------------------------	---------

PROJECTS

E-COMMERCE SHOP - JAGERTHEJAGERSHOP
(04/2024 - 07/2024)

Kind of project	Self-Project
Project description	An E-commerce website to sell Jagermeister
Team size	1
My position in this project	Developer
My Responsibility	I was responsible for designing the layout and building the front-end using React.js for the e-commerce shop. On the back-end, I used Express.js to handle server-side logic, and MongoDB to manage the data for products, users, and orders
Techonologies & Other information	<ul style="list-style-type: none">• Programming language: MongoDB, Express.js, React.js, Node.js, TailwindCSS• Deployment platform: Netlify for Front-end and Render for Back-end• Drawback: Using the free version of Render for the back-end, which causes the server to enter sleep mode when there are no incoming requests and requires it to be woken up• Website Link: https://jagerthejagershop.netlify.app/

Simple Chat app
(10/2024 - 11/2024)

Kind of project	Self-Project
Project description	A simple chat app to have conversation with other created people in that server
Team size	1
My position in this project	Developer
My Responsibility	<ul style="list-style-type: none">• Building the Front-end layout base on the messenger app of Facebook• Handle functions for a chat app like: login/logout/signup, send/receive message, store message data, send/receive message for a group of user
Techonologies & Other information	<ul style="list-style-type: none">• Programming language: MongoDB, Express.js, React.js, Node.js, TailwindCSS• Deployment platform: Netlify for Front-end and Render for Back-end• Drawback: Using the free version of Render for the back-end, which causes the server to enter sleep mode when there are no incoming requests and requires it to be woken up• Website Link: https://jtchatapp.netlify.app/

ADDITIONAL INFORMATION
