## Interests

- Coding, football, swimming, music, technology

- Proactively build my own and my team's professional capabilities.
- Developing and coding new features, and applications, upgrading and fixing bugs to high-quality standards and customer expectations.
- Write and optimize client-side code for web applications, creating fast applications with good UI/UX.
- Developing and coding new features, and applications, upgrading and fixing bugs to high-quality standards and customer expectations.

## WR\_WooDev\_2023\_A project:

- The project is to develop medical software for Woorien's system (WeView, PMSMobile, MyVet). Do examinations for pets, process film, upload/download to AWS, and manage hospitals & accounts—technology: C/C++, C#, WPF, PHP, AWS.
- Position: C# WPF Developer
- Techstack:
  - Framework: C++, C#, WPF
  - SQL: MySQL
  - Architecture: MVC, MVVM
- Waterfall Methodology
- Descriptions:
  - Collaborated with the team leader to investigate, estimate, and resolve customer issues.
  - Developing and coding new features, and applications, upgrading and fixing bugs to high-quality standards and customer expectations.

MAR 2020 - June 2023

**IMT SOLUTIONS (OUTSOURCES) | Software Engineer (Web developer)**

## Vinasoy project (CRM: Admin, E-commerce Retailer, E-commerce Consumer)

- Position: Front-End Team Leader
- Techstack:
  - Framework: Vue 3, Composition API, Javascript.
  - Store Management: Pinia.
  - UI Component: PrimeVue.
  - Utility-first CSS framework: Tailwind CSS.
  - Consume APIs: Axios.
  - Support tools: Azure DevOps, Git, Figma.
- Agile scrum methodology
- Descriptions:
  - Analyze and develop software according to design documents.
  - Participate in code reviews and collaborate with other developers.
  - Proactively build my own and my team's professional capabilities.

- Develop and code new features and applications, upgrades, and bug fixes to high-quality standards and customer expectations.
- The demo features to customers after each sprint.
- Report progress to the Product Manager.
- Analyze and optimize application code for efficiency and performance.
- Write and optimize client-side code for web applications, creating fast applications with good UI/UX.

## **Metabora project (Coin Management)**

- Position: Front-End Team Leader
- Techstack:
  - Framework: Vue 3, Composition API, TypeScript.
  - Store Management: Pinia.
  - UI Component: PrimeVue.
  - Utility-first CSS framework: Tailwind CSS.
  - Consume APIs: Axios.
  - Support tools: Azure DevOps, Git, Figma.
- Descriptions:
  - Analyze and develop software according to design documents.
  - Participate in code reviews and collaborate with other developers.
  - The demo features to customers after each sprint.
  - Report progress to the Product Manager.
  - Analyze and optimize application code for efficiency and performance.

## **Dam ca mau project (ERP: Consumer)**

- Position: Front-End Team Leader
- Techstack:
  - Framework: Vue 3, Composition API, Javascript
  - UI component: PrimeVue.
  - Store Management: Pinia.
  - Utility-first CSS framework: Tailwind CSS.
  - Consume APIs: Axios.
  - Support tools: TFS, Git, Axure Share
- Descriptions:
  - Taking part in code reviews and collaborating with other developers.
  - Proactively growing your professional capabilities and those of the team.
  - Developing and coding new features, and applications, upgrading and fixing bugs to high-quality standards and customer expectations.
  - The demo features to customers after each sprint.
  - Report the progression for the Product Manager.
  - Analyze and optimize application code for efficiency and performance.
  - Write and optimize client-side code for web applications, creating fast applications with good UI/UX.

## **Dien Quang project (ERP: Retailer)**

- Position: Front-End Team Leader.
- Techstack:
  - Framework: Vue 3, Optional API, Javascript.
  - Store Management: Vuex.
  - UI component: CoreUI.
  - Consume APIs: Axios.
  - Support tools: Azure DevOps, Git, Figma.
- Agile scrum methodology
- Descriptions:
  - Taking part in code reviews and collaborating with other developers.
  - Proactively growing your professional capabilities and those of the team.
  - Developing and coding new features, and applications, upgrading and fixing bugs to high-quality standards and customer expectations.
  - The demo features to customers after each sprint.
  - Report the progression for the Product Manager.
  - Analyze and optimize application code for efficiency and performance.
  - Write and optimize client-side code for web applications, creating fast applications with good UI/UX.

## **CH Vinamilk project (ERP: Retailer)**

- Position: Front-end developer
- Techstack
  - Framework: Vue 2, Javascript
  - Hardware tools: Scan Barcode, Serial Port, EPSON printer, JSPrintManager Client App
  - Unit Test: Jest
  - Store Management: Vuex.
  - Tools support: Azure DevOps, Git, Axure Share
- Descriptions:
  - Developing and coding new features, and applications, upgrading and fixing bugs to high-quality standards and customer expectations.
  - Analyze and develop software according to design documents.
  - Manage progress and daily reports.
  - Development software according to leader and PM.

## **Central sterile services department project**

- Position: Fullstack developer.
- Techstack:
  - Framework: ASP.NET (MVC), Javascript, JQuery.
  - UI Component: Bootstrap (AdminLTE3).
  - SQL: SQL Server 2019.
  - Support tools: TFS, Git.
- Agile scrum methodology
- Descriptions:

- Developing and coding new features, and applications, upgrading and fixing bugs to high-quality standards and customer expectations.
- Perform other related tasks as management requests.
- Manage progress and daily reports.
- Development software according to company direction.
- Analyze and develop software according to design documents.

## Akouba project

- Position: Fullstack developer
- Techstack:
  - Framework: ASP.NET (MVC), Javascript, JQuery.
  - UI Component: Bootstrap (AdminLTE3).
  - SQL: SQL Server 2019.
  - Support tools: Azure DevOps, Git
- Agile scrum methodology
- Descriptions:
  - Developing and coding new features, and applications, upgrading and fixing bugs to high-quality standards and customer expectations.
  - Perform other related tasks as management requests.
  - 
  - Analyze and develop software according to design documents.
  - Manage progress and daily reports.

MAR 2019 - JULY 2019

**VIHAT TECHNOLOGY CO.,LTD (PRODUCTION) | .Net developer**

1. Esms project:

- Position: Fullstack developer
- Net (MVC), SQL Server, Extension Chrome, Graph API (Facebook for Developers), Bootstrap
- Descriptions:
  - Developing and coding new features, and applications, upgrading and fixing bugs to high-quality standards and customer expectations.
  - Perform other related tasks as management requests.
  - Manage progress and daily reports.
  - Development software according to company direction.
