ABOUT ME

Full Stack Developer with 6+ years of experience delivering robust and scalable web applications using .NET (MVC & Core), Angular, SQL Server, and modern front-end frameworks. Skilled in full project life cycle development, from requirement gathering and system design to deployment and maintenance. Passionate about continuous improvement, system optimization, and delivering value through clean, maintainable code.

WORK EXPERIENCES

Senior Full Stack Developer

GENE SOLUTIONS COMPANY | **11/2023 - Present**

- Led the development of the **Stock Inventory Management System**, responsible for warehouse, product, and package tracking. Designed UI/UX, optimized content performance, and implemented features for stock transfers and reporting.
  Technologies: .NET 8, SQL Server, HTML5, jQuery, Ajax, Dapper, MVC5
- Developed a **CMS platform (GiaSuSucKhoe)** with Angular 16 and .NET 8 to manage personal tech content and tips. Focused on responsiveness, performance, and user-friendly design.
  Technologies: Angular 16, .NET 8, SQL Server
- Designed and executed deployment plans, migration strategies, and system monitoring for enterprise-grade applications.
- Collaborated with product owners and analysts to define software features and prioritize development.
- Integrated and synchronized customer data from social networks (Facebook, Twitter, YouTube).
- Optimized application performance, scalability, and security through continuous testing and improvements.
- Engaged in research and adoption of new technologies for better software architecture and development processes.
- Designed project roadmaps and migration strategies, ensuring optimal performance and scalability.
- Collaborated closely with business analysts, testers, and team leads to define feature requirements and improve system functionality.
- Integrated third-party APIs and maintained synchronization with platforms such as Facebook, Twitter, and YouTube.
- Key Technologies: .NET 8, Angular 16, SQL Server, CQRS, Docker, Apache Kafka, REST API, Socket.IO

EDUCATION

INFORMATION TECHNOLOGY

FPT UNIVERSITY | 10/2015 - 01/2018

- Completed a comprehensive program focused on software engineering, web development, and database systems.
- Gained strong foundational knowledge in algorithms, object-oriented programming, and system architecture.
- Developed academic projects using Java, HTML/CSS, JavaScript, and SQL.

Front End Developer

TRAINING CENTER : CYBERSOFT

05/2018 - 09/2018

Learned modern front-end practices including responsive design, JavaScript, TypeScript, Bootstrap, Angular, and Webpack.

Back End Developer

TRAINING CENTER : CYBERSOFT

04/2018 - 08/2018

Ecommerce sale managerment(.NET MVC5)
Focused on .NET MVC, REST APIs, database interaction with SQL Server, and application architecture.

Senior Full Stack Developer

TMT SOLUTIONS COMPANY | 12/2019 - 11/2023

- Played a key role in the **Dental Management Software** project, supporting a full-stack team (1 PO, 1 BA, 1 Lead, 3 Devs, 2 QA). Developed and maintained core modules including appointment scheduling, clinic CRM, reporting dashboards, and real-time messaging.
  Technologies: .NET Core 6, Angular 13, SQL Server, Docker, Kafka, Socket.IO, NestJS
- Enhanced UX/UI and performance of legacy systems, ensuring seamless integration with modern components.
- Managed customer websites, handling data syncing with third-party platforms and CMSs.
- Participated in sprint planning, daily standups, and retrospectives within the Agile Scrum framework.
- Contributed to system optimization by implementing caching (Redis), modular APIs (CQRS), and scalable containerized services (Docker).

Junior Full Stack Developer

ĐẤT VIỆT COMPANY | 09/2018 - 09/2019

- Developed an **E-commerce Sales Management Platform,** including POS, inventory, and customer engagement modules. Worked on UI design, real-time sales tracking, and back-office admin panels.
  Technologies: .NET MVC 5, SQL Server, HTML5, CSS3, jQuery, Ajax
- Engaged directly with clients to gather detailed technical and business requirements.
- Developed reusable components and REST APIs to support rapid feature scaling.
- Collaborated with graphic designers to ensure seamless brand integration and modern UI aesthetics.
- Implemented responsive design strategies to ensure cross-device compatibility.

PROJECTS

Stock inventory management | 11/2023 - Present

Your position in the project: Full-stack Developer

- Designed and implemented inventory features including stock entry, internal/external transfers, and product/package tracking.
- Developed RESTful APIs and complex SQL procedures for warehouse analytics.
- Built a responsive and optimized UI using HTML5, CSS3, jQuery, and Ajax.
- Ensured scalability and reliability by integrating .NET 8 back-end services with SQL Server and Dapper ORM.
- **Tech Stack:** .NET 8, .NET MVC 5, SQL Server, Dapper, jQuery, Ajax, HTML5/CSS3, Apache Kafka, Socket.IO, NestJS, CQRS

CMS GIASUSUCKHOE | 11/2023 - Present

Your position in the project: Full-stack Developer

- Developed a personal content management system to share technical articles, tools, and programming tips.
- Created dynamic routing, SEO-ready architecture, and responsive layouts using Angular 16.
- Built the back end with .NET 8 and integrated with SQL Server for blog and category management.
- **Tech Stack:** Angular 16, .NET 8, SQL Server

Dental management software | 12/2019 - 11/2023

Description: Business management website operating a dental, dental chain. Technology: Angular, .NET Core Team: 1 PO, 1 BA, 1 lead, 3 devs, 2 testers
Position: Full-stack Developer

- Developed a comprehensive SaaS platform for multi-branch dental clinics with modules for scheduling, billing, and customer CRM.
- Collaborated with a cross-functional team (PO, BA, Lead, Developers, QA) following Agile Scrum methodology.
- Built scalable microservices with .NET Core 6 and integrated Kafka for real-time event streaming and messaging.
- Implemented WebSocket features using Socket.IO for real-time notifications and appointment updates.
- **Tech Stack:** .NET Core 6, Angular 13, SQL Server, Docker, Apache Kafka, Socket.IO, NestJS, CQRS

Ecommerce sale managerment | 2018 - 2019

Description: platform for sales management, pos HTML/CSS/Javascript/jQuery.
Position: Full-stack Developer

- Built a point-of-sale and inventory system for small-to-medium retailers.
- Developed the front-end using Bootstrap and jQuery, and the back-end with .NET MVC 5 and SQL Server.
- Created user-friendly reporting tools for sales tracking, revenue forecasting, and inventory control.
- **Tech Stack:** .NET MVC 5, SQL Server, HTML5, CSS3, jQuery, Ajax
