m2m

The M2M project aims to increase knowledge and review everything from basic to advanced. The project consists of 1 team leader and 4 deputy leaders. Each vice-leader will have about 2 to 3 teams to make requests and deal with the requests that students will make. I have learned how to work in groups, think, and be self-aware at work.
Currently, I am working on a web project about rare animals, a web that manages and lists animals that are and are in danger of extinction, how to protect them, their status, and their habitation.
