WORK EXPERIENCE

FPT software   01/2024   -   12/2024

Full-stack Developer

- Project: Developed and maintained the Manheim Market Report (MMR) system for Cox Automotive

- Description: The Manheim Market Report (MMR) system is a used car valuation tool that provides wholesale pricing information based on actual transaction data, updated daily. The project focuses on upgrading and maintaining the system to accurately reflect market values, meeting the needs of users in the automotive industry.

- Technologies:
  • Backend: Springboot
  • Frontend: ReactJS, Redux, Redux-Saga

- Job Responsibilities
  • Implemented, modified, and removed features based on customer requirements to enhance functionality and user experience.
  • Worked on both frontend and backend to implement features efficiently.
  • Actively involved in the development workflow and professional source code management with Git and GitHub
  • Fixed production issues and security vulnerabilities (GitHub Dependabot, Veracode).
  • Maintained and extended infrastructure with AWS CDK.
  • Actively participated in Scrum-based project management, communicating in English.
