ĐẶNG THÀNH LỘC

Fresher .NET Backend Developer

Contact

Github: Github.com

Skills

Backend:

- C#.NET, Spring Boot, Node.js
- LINQ, RESTful API
- SQL, Redis, PostgreSQL, MongoDB

Frontend:

- HTML, CSS, JavaScript, Bootstrap, Tailwind CSS
- ReactJS

Salesforce:

- Apex, LWC, SOQL, SOSL
- Apex Triggers, Flows, Unit Testing

Tools:

- Git, GitHub, TortoiseGit
- Swagger, Postman, Jira
- Docker

Soft Skills:

- Time management
- Problem-solving
- Business communication
- Teamwork
- Strong adaptability
- Logical thinking

Summary

Final-year Software Engineering student who has completed all coursework and is available for full-time work. I have a strong foundation in C# and .NET backend development. With hands-on experience in backend development, RESTful APIs, and database management, I aim to become a skilled .NET Backend Developer.

Career Objective

Seeking a full-time role as a Fresher .NET Developer to apply and grow my skills. In 2–3 years, I aim to become a Senior .NET Developer with strong technical expertise and leadership skills.

Education

Ho Chi Minh University of Technology (HUTECH), HCM.

Software Engineering   02/2021 – 06/2025(expected)

- **GPA**: 3.44/4

Awards And Achievements

- Cybersoft Academy Scholarship (March 29 of 2023).
- Scientific research topic: "Application of Machine Learning and Natural Language Processing in Solving Fashion-related Problems."

Languages

- **English**: Intermediate
- **Vietnamese:** Native

Interests

- Chess, Chinese chess, Volleyball

Project

1. Fashion Store (Team Project)
Team size : 2
Role: Full-Stack Developer

- **Description**: Web application for users to register, log in, manage profiles, search and purchase fashion items. Admin features include managing inventory, orders, and revenue.
- **Responsibilities**: Designed database schema, implemented backend APIs using ASP.NET Core, Built the frontend using ReactJS and Tailwind CSS.
- **Technologies**: ASP.NET Core, Entity Framework Core, JWT, REST API , SQL Server, ReactJS, Tailwind.
- **GitHub**: [GitHub Link](#)

2. Online Test (Single Project)
Role: Full-Stack Developer

- **Description**: Created a test-taking platform with registration, test saving, reviewing, and admin control.Admin can create ,edit,delete test,detail test, manage users.
- **Responsibilities**: Designed database schema, implemented backend MVC, and integrated frontend with Html,Css,Js.
- **Technologies**: ASP.NET Core, MVC, JWT, SQL Server, Html, Css, Javascript, Bootstrap.
- **GitHub**: [GitHub Link](#)

3. Cinema (Single Project)
Role: Full-Stack Developer

- **Description**: Built system for booking movies, reserving seats, ordering snacks. Admin features include managing movies, snacks, and user accounts.
- **Responsibilities**: Designed database schema, implemented backend using WinForms.
- **Technologies**: C#, WinForms, SQL Server, MVC**.**
- **GitHub**: [GitHub Link](#)

4. Tour Booking (Team Project)

Team size : 5
Role: Backend Developer

- **Description**: Developed backend APIs for user registration, login, booking, order handling. Admin can create, edit, delete, and view tour details.
- **Responsibilities**: Designed database schema, implemented backend APIs using Node.js.
- **Technologies**:Node.js, Express, MYSQL Workbench, Redis.
- **GitHub**: [GitHub Link](#)
